

Versa Solution Master Class

Course Details

<https://academy.versa-networks.com>

The Versa Solution Master Class (VSMC) provides an overview of Versa solution portfolio, various solution components such as Secure Service Edge (SSE), Secure SD-WAN and their architecture and characteristics. The course also explains various deployment models available and how they can seamlessly transition and benefit from SD-WAN to SASE.

OBJECTIVES

- ✓ Obtain an overview of various Versa solution offering
- ✓ Describe Versa Secure Access Service Edge (SASE) solution components
- ✓ Describe a typical SASE platform and its characteristics.
- ✓ List the various security services and connectivity models available for a SASE architecture.
- ✓ Describe the technology, building blocks, and core capabilities of Software Defined Wide Area Network (SD-WAN).
- ✓ Identify the real-time options available for SASE deployment.
- ✓ Explain Versa Secure SD-WAN solution and components.
- ✓ Describe the key considerations and the process of transitioning from SD-WAN to SASE.
- ✓ Explain how ease of scalability and security combined with simplicity make Versa SASE the ideal digital transformation solution.
- ✓ Identify the key evaluation criteria for choosing a SASE vendor.

Duration

One day, 6 Modules

Audience

This course is designed for engineers, architects, designers, and IT leaders that are interested in understanding, exploring, or deploying Versa solution.

Course Type

Classroom-based, instructor led

Prerequisites

Understanding of Open Systems Interconnection (OSI) reference model and TCP/IP

Understanding of security concepts.

Foundational knowledge on virtualization concepts

Versa Solution Master Class

COURSE CONTENT

Module 1 Course Introduction

- What you can expect
- Know your trainer
- About Versa

Module 2 Introduction to SASE

- Overview of Secure Access Service Edge
- Building block of SASE architecture
- Characteristics of SASE platform
- SASE features

Module 3 SASE Solution Components (Security Services Edge)

- Zero Trust Network Access
- Secure Web Gateways
- CASB, DLP, RBI, Sandbox
- SASE Client

Module 4 SASE Solution Components (Secure SD-WAN)

- Basics of SD-WAN
- Solution components
- Topologies
- Multi-tenancy
- Versa Operating System (VOS)TM
- Deployment models
- Secure SD-WAN for lean IT

Module 5 Versa SASE deployment Options

- Understanding Versa SASE Service
- Single Pane of glass Management
- Transition Approaches

Module 6 QA, Key takeaway and next step

HOW TO GET YOUR CERTIFICATE

Login to Versa Academy
<https://academy.versa-networks.com>

Complete online Master Class exam
The exam will be available to class participants only

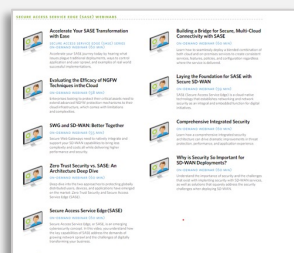

Get your Certificate immediately
Successful candidates will get a certificate via email
